

CURRICULUM BULLETIN

2022-2023

MIAMI'S MEGAMAGNET

MRS. NICOLE BERGE-MACINNES
Principal

ACADEMY DESCRIPTIONS

Academy of Agricultural Science

Students in the Academy of Agriscience will explore the field of Agricultural Biotechnology while learning about areas of current agricultural biotechnology applications, genetic principles, tissue/cell culture, and the potential for biotechnology in the field of agriculture. Research partnerships with the United States Department of Agriculture will enable students to participate in summer internships and conduct research on rare and native tropical plant and animal species impacting the industry. Students will explore additional processes to harness renewable energy, more efficient and effective methods utilizing existing resources, and ways to reform the global hunger crisis. Students follow a sequential program of study that leads to industry certification. Through their participation in the National FFA Organization, students will have opportunities to develop their leadership and professional development skills.

Academy of Business and Finance

The Academy of Business and Finance connects our students with the world of financial services, offering a curriculum that covers entrepreneurship, banking and credit, financial planning, insurance and accounting, among other topics. Our academy is also designated as a distinguished program of the National Academy Foundation, an acclaimed national network of high school career academies. In addition to studying a career-focused curriculum and working on collaborative projects, students gain critical career knowledge through a series of work-based learning experiences both inside and outside of the classroom. These activities include job shadowing, mock interviews, resume writing workshops, and culminate with a compensated internship. Local business partners work with academy teachers to provide these opportunities that round out students' education. Students follow a sequential program of study that leads to industry certification.

Academy of Engineering

The Academy of Engineering follows Project Lead the Way's very rigorous national curriculum. The curriculum is based on the ideals of project-based learning and 21st century skills, which include hands-on projects with emphasis on how these newly learned skills can be applied to the workplace. The curriculum covers almost all the topics included in a four-year college engineering program. Students will have the opportunity to learn engineering concepts and theories, and then apply them in the classroom to examples of current real-world engineering problems. This program provides students with an advanced understanding of the knowledge, human relations, and technological skills found in today's engineering professions. Students follow a sequential program of study that leads to industry certification. Students will be able to participate in the National TSA and SECME organizations.

International Baccalaureate Academy

Self-motivated college-bound students will find the challenging curriculum of the International Baccalaureate Diploma Programme hard to resist. In addition to advanced course work, students will submit a 4,000 word Extended Essay research paper in one of the subjects of the IB curriculum, take a Theory of Knowledge course and engage in at least 150 hours of community service in the Creativity, Activity, and Service (CAS) component. Students will demonstrate their proficiency through subject-area exams representing six core academic areas, which may enable them to earn college credit or advanced standing at prestigious universities, both domestic and international.

Academy of Legal and Public Affairs

The Academy of Legal and Public Affairs provides students with fundamental competencies which will enable students to develop skills, knowledge, and attitudes necessary for career advancement within the cluster of Law, Public Safety, and Security related careers. The academy is designed for students who are interested in public policy, law enforcement, forensics, and the legal and criminal justice system. Students will take an array of academy classes that focus on broad, transferable skills and stress the understanding of ethical and sociological standards as it related to criminal justice procedures and laws, court procedures, public safety, corrections, criminal investigative procedures, crime prevention, and entrepreneurship. Students are members of FPSA and participate at district and state level competitions. Program completers will have an opportunity to earn industry certification as an Accredited Legal Professional (ALP).

Academy of Leisure Medicine and Health Science

The Medical Academy provides all students with a sound academic foundation that will enable them to apply their knowledge and skills for continued study in a healthcare career. Students will take a core of intensive academic courses to provide a solid foundation in anatomy, physiology, medical terminology, medical math, disease processes, body mechanics, and basic human needs. Senior Medical Academy students enter the strand of their choice and focus on their selected area of interest. Students are members of the Health Occupation Students of America (HOSA), and compete at the Regional, State and National level. Clinical exposure in community health facilities and organizations provide students with opportunities to apply their newly acquired skills in their chosen field.

Academy of Visual & Performing Arts

The Visual & Performing Arts Academy at Coral Reef Senior High School offers six strands of specialization: Visual Arts, Theatre Arts, Dance, Band, Chorus and Orchestra and is comprised of actors, singers, dancers, musicians, and artists who strive for excellence in academics and creative expression. Over the four years, students focus on an Honors Arts curriculum immersed in the theory and practice of their particular discipline. Art labs, dance and music studios and black box theatre serve as settings for our academy students. Our professional arts teachers all share in the same endeavor, to further the training of career-minded arts students who respect and appreciate the role of the arts in their lives and the life of our community. Students perform, compete and exhibit their works throughout the District, State and National levels. With diligence and application, students develop their maximum potential while working in a nurturing and family environment!
